IOWA CHAPTER - ASHRAE

FOREWORD

The 2015 Chapter Membership Directory and Product Directory of Manufacturers and their Representatives in the Central Iowa area has been prepared by the Iowa Chapter of ASHRAE as a service to all its members and as a service to the local HVAC industry.

The Directory is intended to provide better communications between manufacturers and their sales representatives, engineers who specify products, contractors who purchase and install the equipment, and other interested parties. Product Directory listings are not limited to ASHRAE members and the listings are not to be considered as advertising or endorsement by ASHRAE of any product, manufacturer or representative.

Since the Directory is useful when the data it contains is current in all respects, the Chapter re-issues an updated version on an annual basis.

The membership roster is based on ASHRAE's database. Members are encouraged to verify their information and update their bio on www.ashrae.org. Please note that corrections have been made to this directory, in cases where the authors have been made aware of changes in employment or contact information.

Additional copies of this Directory are available at \$5.00 per copy.

Suggestions on ways of improving the Directory or notification of errors in this edition are sincerely invited. Please contact:

Andrew Pospisal

Metasys

Direct Digital Control (DDC) Systems with web-based access, wireless systems utilizing ZIGBEE technology, and Energy Essentials reporting. (DDC systems include standard BACnet MS/TP, N2, and LON communication trunks)

Panoptix

A building efficiency system driven by a suite of cloud-based apps that allow you to see exactly how every system, subsystem, and device is functioning, and to take actions to improve their performance.

Central Plant Optimization

Allows you to operate your central plant at its most efficient level. The innovative software algorithms make real-time automatic adjustments to the system based on real-time building loads, resulting in significant energy savings.

Healthcare Environment Optimization

The hospital's building automation system reacts in real-time to surgical scheduling – documenting environment conditions, saving energy, improving clinical outcomes, and improving patient care.

Metasys Compatible Products

Integration to standard HVAC equipment with manufacturer furnished and installed controls. (Includes boilers, chillers, fume hood controls, lighting controls, KWH monitoring, VFDs, Rooftop Units, Computer Room Units, and Air Handling Units)
